Profile

Recent coding bootcamp graduate at [Le Wagon](#). Ruby on Rails Full Stack Developer with considerable experience in technology. I can deliver [Front-End](#) and [Back-End](#) projects with payment integration, admin interface, user management, mailer, geolocation and many other features.

Objective

I'm looking to work as a Full Stack Developer at a company where I can develop my Front-End and Back-End skills so we can both grow together.

Web Development Summary

- Algorithms and Programming with Ruby.
 - Web Application Development with Ruby on Rails.
 - Web Application Diagram (MVC, user stories, database schema).
 - SQL, MySQL and PostgreSQL Database
 - Front-End Development: HTML, CSS, Javascript (jQuery) + Bootstrap
 - Collaborative coding with Git and Github
 - Deployment on Heroku
 - Team project: built a finance platform for SMEs to pre-finance their open invoices in 10 days: www.advalori.com
- Technical environment:* Ruby, ruby on rails, Postgres, HTML, CSS, Javascript, JQuery, Bootstrap, Git / Github, gem (devise, activeadmin, pundit, rails admin, stripe, geocoder. . .)
